## Central Lakes Corvette Club Radio Info

The Relm model RPV4200 146-174MHz is no longer available.

The new replacement Relm model is "RP7200 136-174MHz, 5-Tone" the package will come with:

- 1 Radio
- 1 Antenna
- 1 Battery
- 1 Belt Clip
- 1 Desk top charger (110 volt)

The cost of this package is \$199.00

These radios will require software to program them. (The software has changed from what was used with the old radios). I have the software and programming cable.

Orders can be placed directly with Relm Radio (now branded as BK Technologies). Contact Brian Rodrigues at phone number (321) 953-7974 and tell him this is for Central Lakes Corvette Club.

The new Relm RP7200 is 100% compatible with our Relm RPV4200 and the older Relm RPV516 radios.

Once you get the radios, contact me, I can then set up a time to program them. Currently these radios need to be programmed with a computer and we are not cloning them.

I still can program and clone the Relm model RPV4200 146-174MHz if needed.

Michael Rader
